

Mrs. Chouinard's November Newsletter 2013

Dear Parents,

Thank you for your help with the Halloween Party! We all had a great time. I am blessed to work at Westwoods!

Math:

We will be completing our graphing unit over the next two weeks. Students are learning to construct, and read different kinds of graphs. Key vocabulary learned: mode, median, range, outlier, and cluster of data.

Next we will return to multiplication and division. Our focus will be using open arrays for double digit multiplication, and learning new strategies for division.

Please continue to encourage your child to practice their multiplication facts. Next week they will be quizzed on 6's up to 6×12 .

Upcoming Science Unit:

The Water Cycle and States of Matter

Essential Questions:

1. What is the water cycle?
2. How is the water cycle related to weather?
3. How do land features affect the water cycle?
4. How can weather be predicted?
5. How do our actions affect water on Earth?

Reader's Workshop

Books your children are currently reading:

***Many Non-Fiction Topics**

***Biographies**

***The I Survived Series**

All students will be creating web sites or Prezi presentations to display their findings!

Try this website for math practice and reading skills all while playing games!
